Skills

- Python
- FastAPI/Flask
- PostgreSQL
- ETL Pipelines
- Data Engineering
- Amazon ECS
- Amazon S3
- React.js
- Vue.js
- CI/CD
- Gitlab
- Pytest
- Docker
- Amazon Web Services
- Jira
- Confluence
- Large Language Models
- ChatGPT
- Leadership
- Collaboration
- Time management
- Foreign Languages

Experience

AlliedOffsets	June 2024 - Present
Software Engineer – Python	London
One of two engineers owning AlliedOffsets’ core data systems, spanning ETL pipelines, APIs, and internal tools. Built and deployed full-stack applications for carbon markets using React, FastAPI, PostgreSQL, and AWS (Docker/ECS). Maintained and stabilized production pipelines, rapidly resolving incidents and partner-facing data issues. Delivered greenfield projects including internal MVPs, data scrapers, and a ChatGPT-powered AI assistant.	
Hullabalook	November 2021 – September 2022, November 2023 – March 2024
Software Engineer	London
Developed and maintained full-stack web and e-commerce applications using HTML, CSS, JavaScript, Vue.js, and Python. Spearheaded migration of legacy applications to modern platforms, improving stability, reliability, and long-term maintainability. Worked with customer and operational data using Pandas and NumPy to clean, analyze, and map datasets to application requirements.	
QuantSpark	September 2022 - November 2023
Python Developer	London
Developed and maintained financial client dashboards, creating Flask API endpoints and managing PostgreSQL schemas with SQLAlchemy. Utilized Pandas and NumPy for data processing, conducted unit testing with Pytest and Postman, and containerized projects using Docker.	
Education	
Queen Mary University of London	September 2020 - September 2021
Distinction	MSc Computer Science
Queen Mary University of London	September 2017 - July 2020
First Class Honours	BEng (Hons) Electrical and Electronic Engineering
Projects	
MoveInNow	
Developed a property search platform using Python, BeautifulSoup, and Selenium to extract property data from leading UK portals. Integrated REST APIs to refine search results, eliminate duplicates, and enhance search efficiency, ensuring alignment with client criteria.	
Certifications	
Learn React	December 2025
Scrimba	
Investing In Stocks The Complete Course	January 2025
Udemy	
The Complete Python Developer	December 2023
Zero To Mastery	
Responsive Web Design	December 2021
freeCodeCamp
